

C19 d-Response

C-19 digital response project

Upon the outbreak of the COVID-19 pandemic, most organisations, including those in the education sector, were not ready to adopt online learning programmes, following systematic approaches and actions.

The d-Response project came as a response to the VET organisations' needs that were not fulfilled. Specifically, it addresses the preparation processes, to effectively implement online/blended learning during times of crisis.

The project intends to provide vet organisations and individual educators tools that ensure the continuity of the educational process and the educational business.
